Focus Ninja

task - manager

Juan Noguera - 2024

Hi there!, I'm Juan

SM - Entrepreneur

About me:

- Adventurous entrepreneur hailing from Venezuela.
- Dispute Resolution Pro.
- Almost a decade here in BCN.
- Hobbies: Competitive MTG. And whenever I can, I also immerse myself in the restoration of Danish-style furniture.

FOCUS NINJA
IRONHACK

Why Focus Ninja?

The name, Focus Ninja, stems from the idea of cultivating a mindset of **sharp focus** and quiet determination amidst the everyday chaos. It reflects our belief in the power of concentration to transform your goals into tangible realities and to become the **master of your own destiny**. In this digital world full of distractions, Focus Ninja invites you to find calm in the storm, to **discover the beauty of simplicity**, and to walk confidently towards your deepest dreams.

How Does It Work?

Users can: sign up

The image displays two versions of a login/registration form for 'Focus Ninja Ironhack'. Both forms share a consistent branding with a purple robot head logo and a light purple gradient background.

Left Form (Login):

- Logo: Focus Ninja Ironhack
- Form Fields:
 - E-mail:
 - Password:
 - Sign In:
- Footer:

Right Form (Registration):

- Logo: Focus Ninja Ironhack
- Form Fields:
 - E-mail:
 - Password:
 - Confirm Password:
 - Let's get started!:
 - I already have an account!:

and start adding tasks

A collage of three mobile app mockups for a user profile. The top mockup shows a header with a menu icon, a profile picture of a German Shepherd, and a time display of 20:55. The middle mockup shows a profile card with fields for Name, Username, Website, and Email, all filled with the user's details. The bottom mockup shows a similar profile card with a 'Update your Profile' button at the bottom.

The image shows the Ninja Tasker app interface. At the top, there's a navigation bar with a hamburger menu, a ninja icon, the time 20:54, a profile picture, and a close button. Below the navigation bar is a purple button labeled 'Create New Task'. The main area displays a grid of task cards. A modal form for creating a new task is open in the center, showing fields for Title, Description, Starting Time, and a duration selector set to 30 minutes. The task cards in the background include 'Test 1' through 'Test 12', each with a title, description, duration, and a 'Completed' status indicator with colored dots.

The Technical Challenge

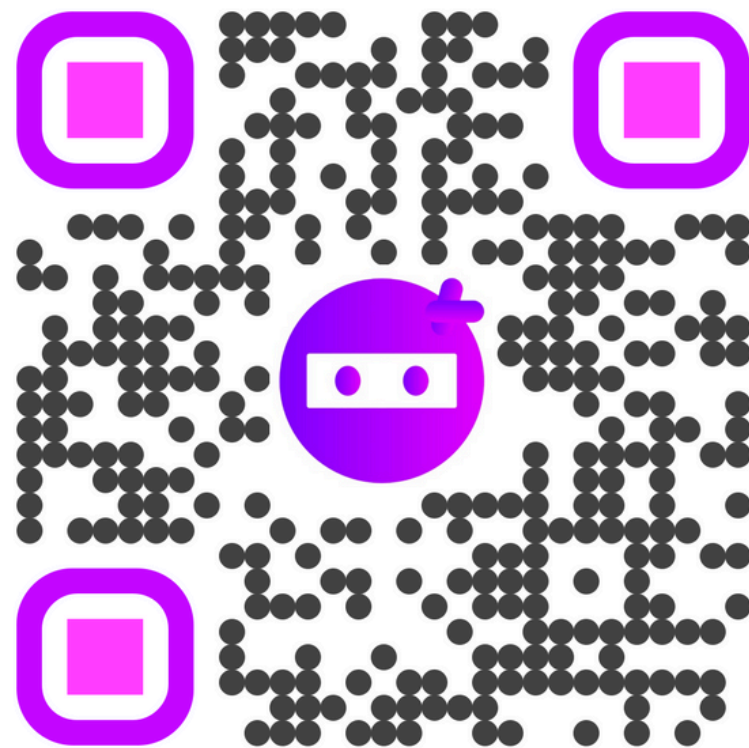

The most significant technical challenge was underestimating the **complexity of asynchrony** when multiple components depend on the cycle to run smoothly and sensibly.

Overcoming the obstacles

The key to the solution was to iterate and make progress **step by step** until I could start seeing the underlying functionality clearly.
